Time Q Plus Face Scan

Face Scan Time/Attendance System

Affordable, User Friendly, Easy Set Up Never Total Another Time Card Again!

Phone: (604) 460-8670 - Toll Free: 1-877-460-9602

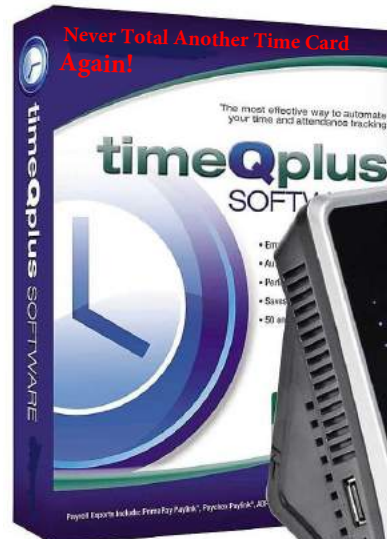

The Time Q Plus 50 Employee Version software accommodates two classes of overtime plus 7th day overtime for weekly, bi-weekly, semi-monthly or monthly pay periods. The system will allow you to configure up to 12 shifts, each with their own standard start and stop times and lunch rules. The software records hours worked for overtime-eligible employees, records sick time, vacation, holidays and other absences for salaried exempt employees. There's no longer any need to use different tracking methods for both exempt and non-exempt/hourly employees as all employees can use TimeQPlus.

Features

- **Face Scan** Technology: facial Recognition punch IN/OUT

Special Price
\$1,095.00

Technical Requirements:

- Windows Server 2003 (Std or Enterprise), Windows Server 2008 (Std or Enterprise), Vista Business or Enterprise, Windows 7
- Intel Pentium III 600MHz Compatible or faster processor, 1 GHz or faster processor recommended.
- 192 MB RAM or more, 512 MB or more recommended
- 425 MB Disk Space Available
- Internet Explorer 6.0 or Above

Face Scan Terminal features a large and bright backlit LCD display and can be connected to your PC or network via **USB, serial (RS232) or Ethernet**. Built-in memory can store up to **50,000 transactions**. An internal battery ensures punches stored in the terminal are retained in the event of a power outage. Software can be scheduled to automatically poll the terminals at custom time intervals to retrieve stored transactions.

Never Total Another Time Card Again!

TimeQPlus Intelligent Time and Attendance Systems

Employees clock in and out using facial recognition, a PIN (or any combination of these), as well as via PC-punch. Using facial recognition, employees simply look at the terminal to clock in and out. Virtually eliminates costly "buddy punching." This complete kit includes everything you need to get started - software for 100 employees (expandable up to 250 employees), software network upgrade, and one TQ600F facial recognition biometric terminal with cables, power supply, and mounting hardware.

TimeQPlus Software at a glance

- **Adaptable:** Handles two classes of overtime and 7th day overtime for weekly, bi-weekly, semi-monthly and monthly pay periods. Additionally, you can configure up to 12 shifts, each with their own standard start and stop times and lunch rules, as well as track job costing with work codes.
- **Versatile:** Records hours worked for overtime-eligible employees, and records sick time, vacation, holidays and other absences for salaried exempt employees. There's no longer any need to use different tracking methods for exempt and non-exempt/hourly employees - all your employees can use timeQplus.
- **Intuitive:** You can quickly install the timeQplus software yourself. A helpful user manual and built-in software "Wizards" will guide you through configuring the software to reflect your timekeeping and payroll policies. You can configure the software interface to display in your choice of English, Spanish or French.
- **Useful:** Displays hours worked and in/out status on terminal when employee clocks in or out. Real time In/Out board makes it easy to see who's in or out of the office - no polling required!
- **Economical:** Saves time and money on preparing payroll. Supervisor can edit and approve the electronic time cards at the PC. The software automatically calculates hours worked and exports data to most popular payroll software and services including ADP, Paychex, and QuickBooks. This reduces clerical errors while streamlining the payroll process.
- **Expandable:** This system grows with your business. Start with what you need now, and easily add capacity as your needs change. Add optional terminals at any time; you can even mix magnetic, barcode, biometric, and proximity terminals on the same system! Software upgrade packs are also available to expand capacity to a total of 250 employees.

TimeQPlus Modern technology for data collection

- Employees clock in and out simply by Face Scanning Eliminates the need to constantly reorder paper time cards!
- The **TimeQPlus Face Scan** terminal also allows employees to clock in and out by using the keypad. It gives employees the ability to clock in or out even without their badge. Furthermore, employees can clock in or out via a networked PC using the TimeQplus Software.
- TimeQplus Software supports multiple and mixed terminals (Magnetic, Barcode, Proximity, Biometric, or FaceVerify). Allows your employees to punch in and out at different locations within your facility.

TimeQPlus Terminal Specifications

Please note: your system must have a Software Network Upgrade installed before you can install Proximity, Biometric, or Face Scan terminals (this upgrade is included in the kit). You can mix-and-match Proximity, Biometric, or Face Scan terminals on a single system.

Terminals feature a large and bright **backlit LCD display** and can be connected to your PC or network via USB, serial (RS232) or Ethernet.

Each terminal's **built-in memory** can store up to 50,000 transactions. An internal battery ensures punches stored in the terminal are retained even in the event of a power outage. You schedule the software to automatically poll the terminals and retrieve the stored transactions. Terminals include industry-leading 1-year manufacturer warranty
